Azim Baji Krishna

A passionate developer who is fond of turning ideas into reality. Over the past few years, I've gained experience as a full-stack developer by working on projects and being able to make elegant front-end websites with immense features.

Bhavans Vidya Mandir, Pathanamthitta, Kerala

07/2020   *Result – 79.6%*

PERSONAL PROJECTS

\

Industrial website (02/2023 – 03/2023)
- This industrial website was developed as one of my freelancing projects. The website is used to send inquiries, to display the services provided, projects, and contact information about the organization.

Online tuition management system (12/2022 – 02/2023)
- This system helps to manage all the sessions and is used to keep a record of students, payments, and schedules, and can also send report cards.

PublicLens (04/2022 – 05/2022)
- A website that can be used to report missing persons and sightings with a helpline and full admin panel for management, including several mailing functions.

Online assessment system (10/2021 - 11/2021)
- A web system that can be used for conducting exams, managing student records, displaying results, etc along both student and teacher panels.
